

-  Fold used in construction
-  Mountain fold
-  Valley Fold
-  Probably want to cut around here

For standard business cards, use A4 or 8½×11 paper (for even better fit, try narrowing it slightly). A square of like dimensions is fine too. All folds except the two bold ones are horizontal, vertical, or at 45° angles. A few minor creases not shown.

Shown with a fold in place of cut. Note that the corners fold over the edges beneath, holding the form together.
